

Step 3: Sign Document

1. Signature Field

Click on the Signature field to begin digital signing.

2. Add Digital ID (by choosing file)

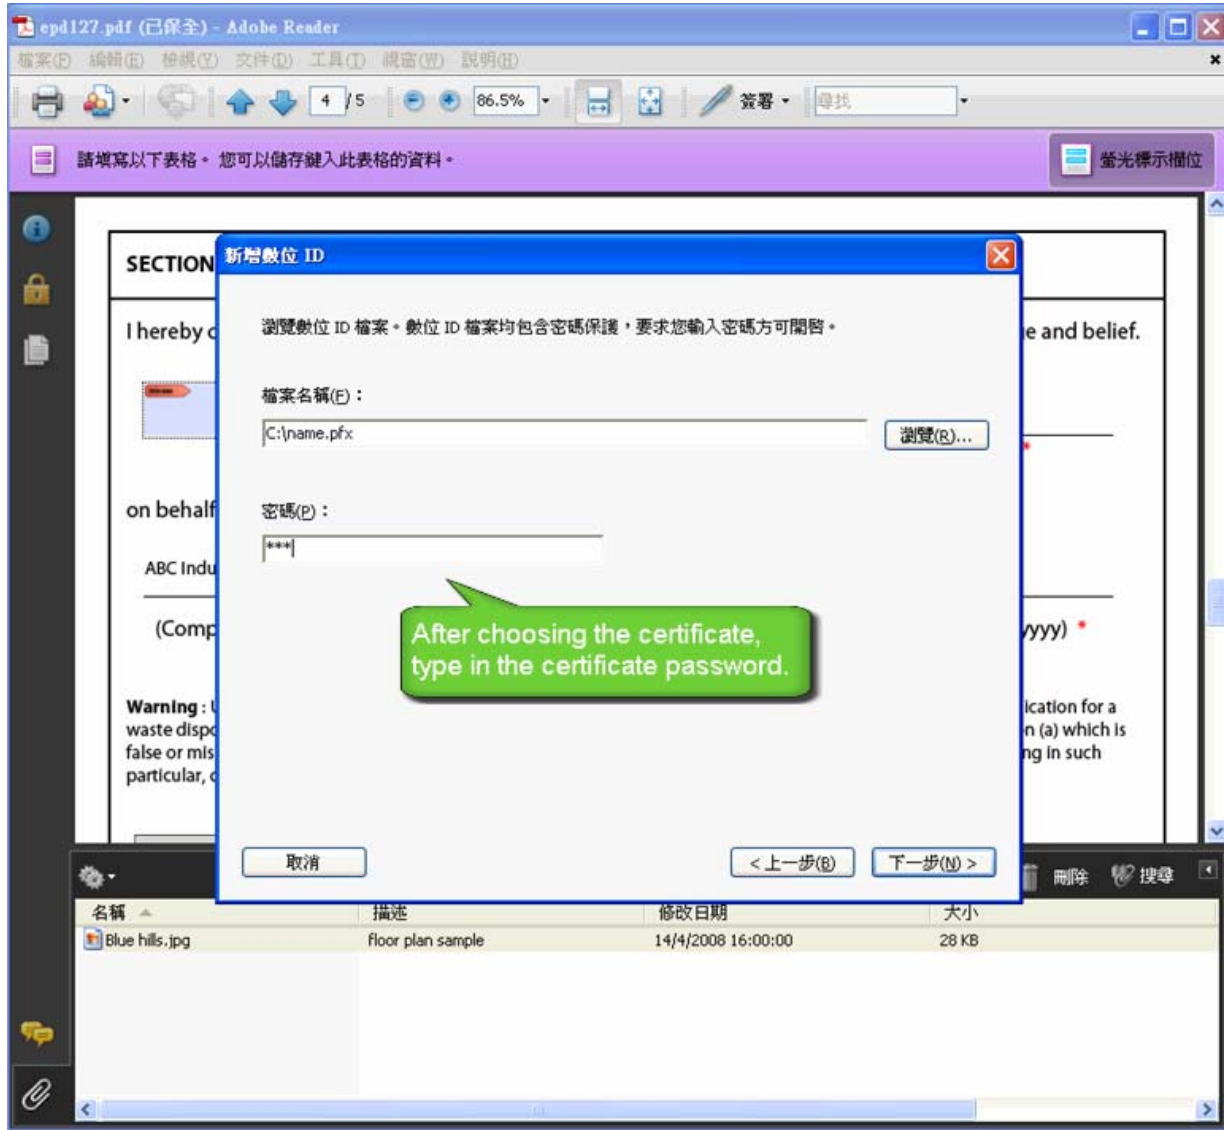

Choose a media of your digital certificate, you can choose:

- A file
- A roaming digital ID stored on a server
- A device connected to this computer

In this demo, we choose a certificate file.

If you have added digital ID before, this screen will not be shown again. You can use added digital ID or add another digital ID in security settings.

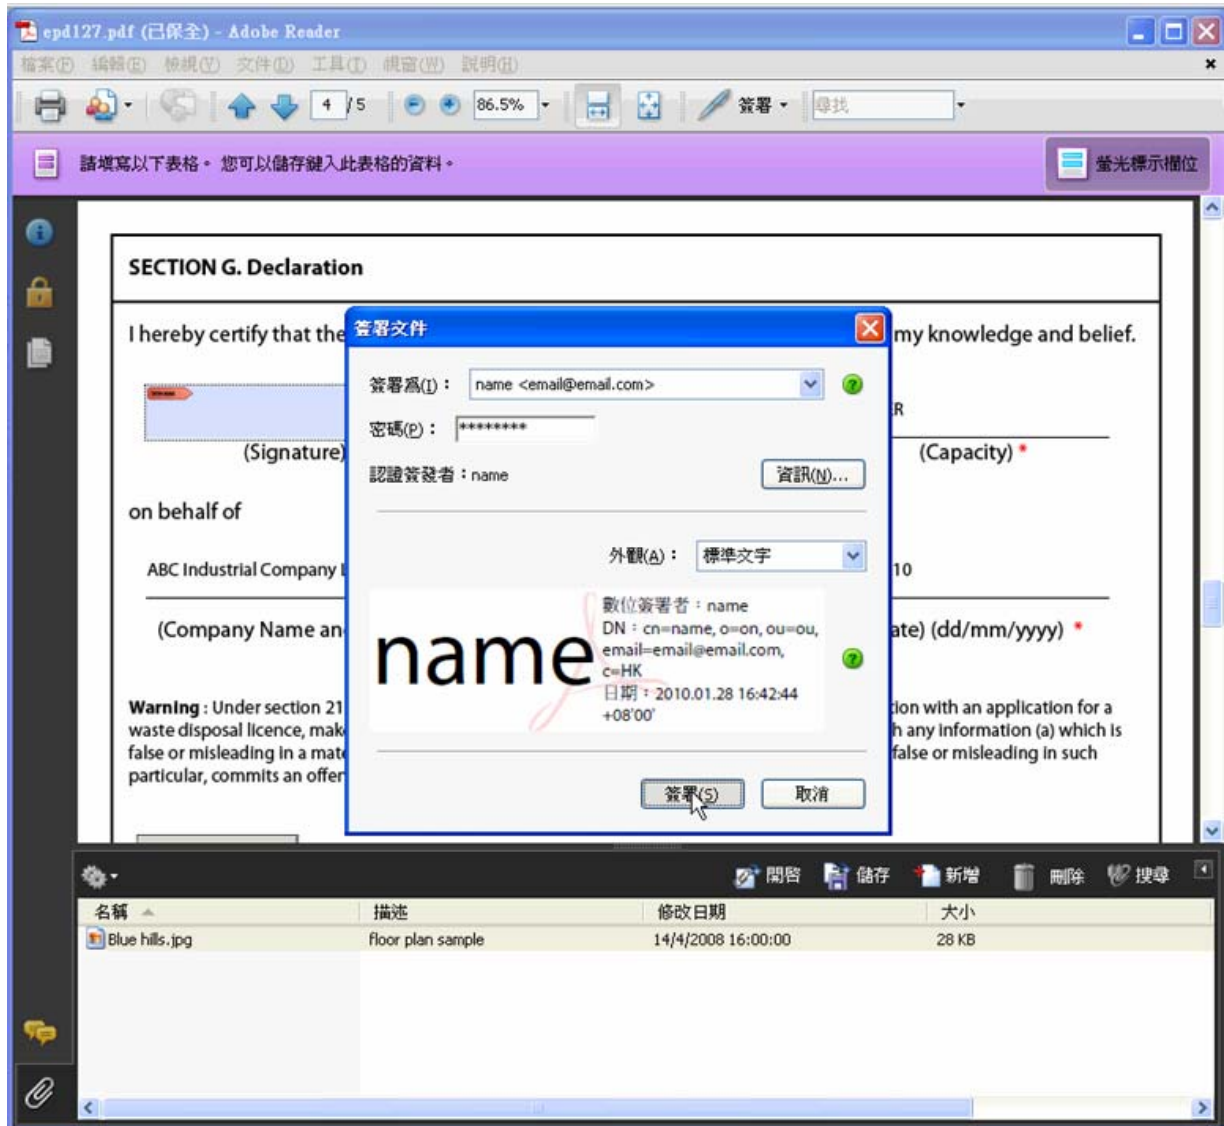

3. Add Digital ID (input password)

After choosing the certificate, please type in the certificate password.

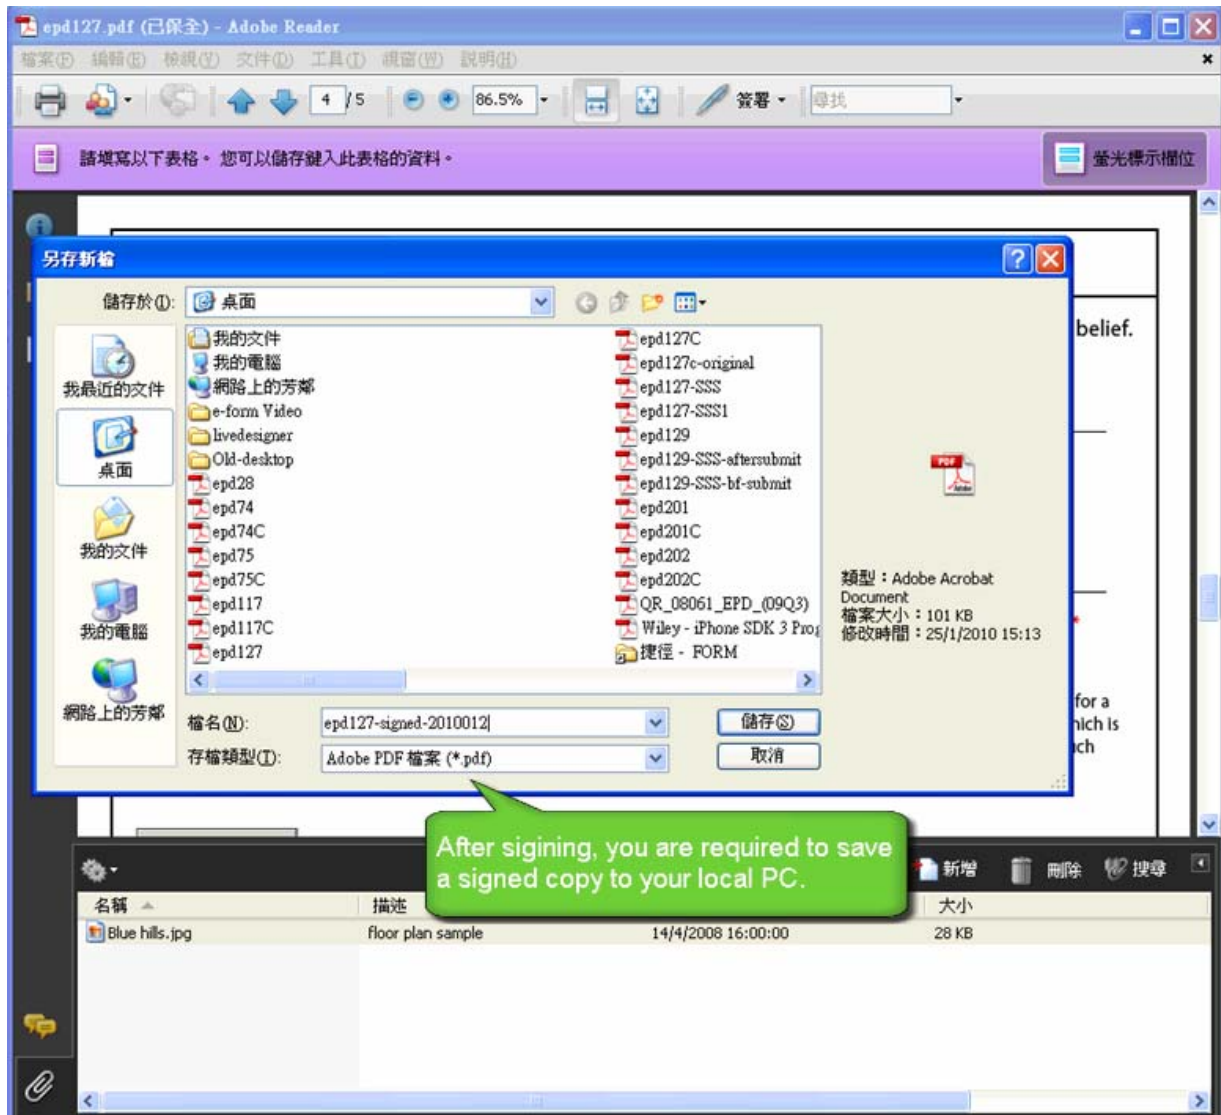

The digital ID has been imported and you can use it for sign and encrypt documents.

4. Sign Document

Choose the digital ID and type in password for sign and encrypt document.

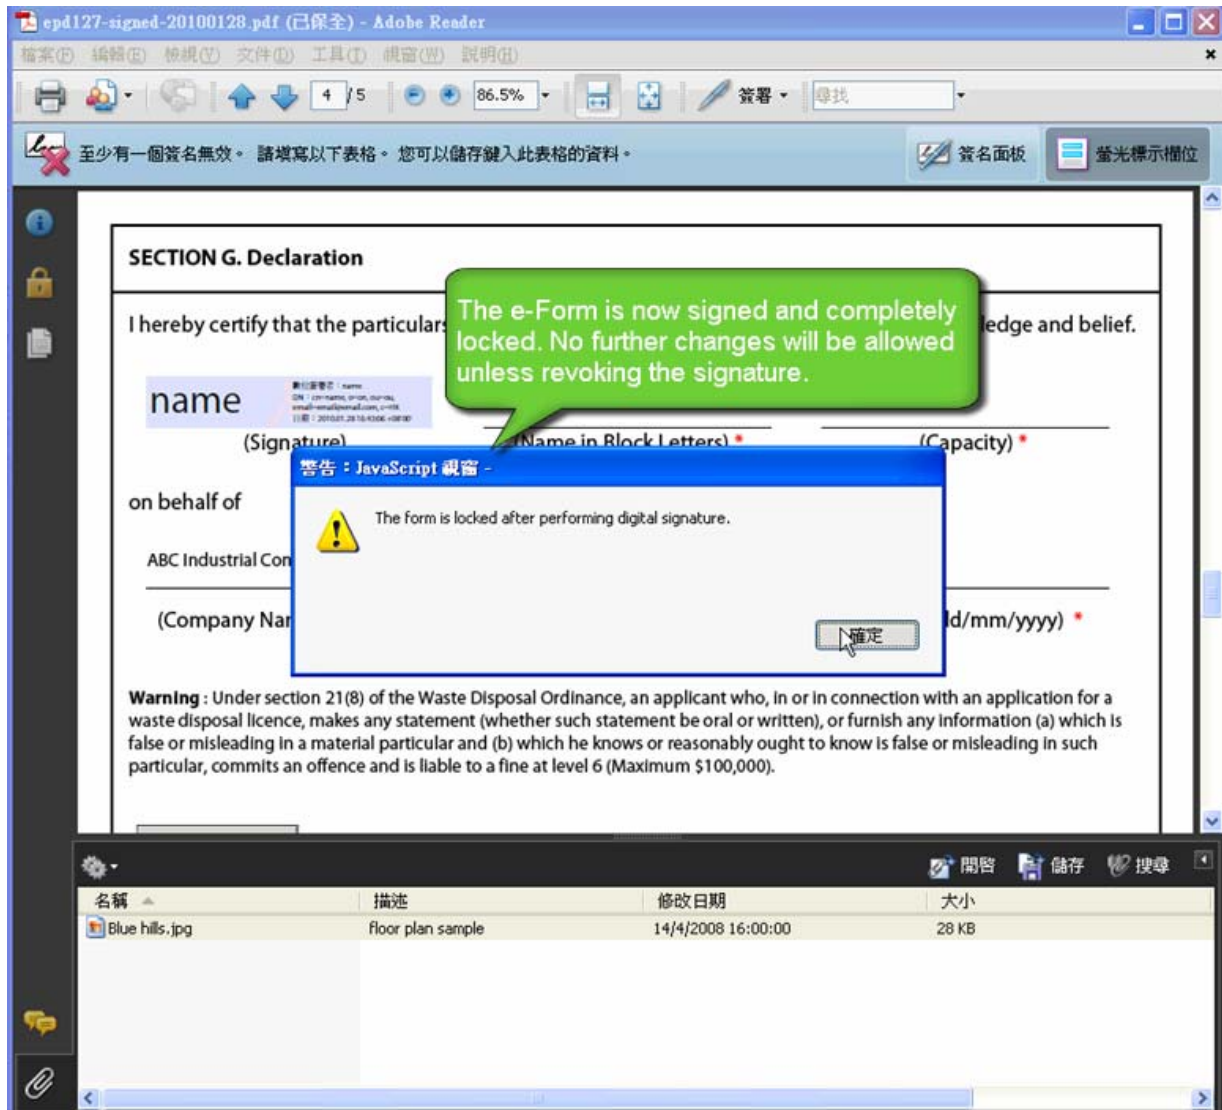

5. Save signed document

After signing, you are required to save a signed copy to your local PC.

Otherwise the document will not be signed.

6. Lock signed document

The e-Form is now signed and completely locked.

No further changes will be allowed unless revoking the signature.

7. Go to Step 4: Submit Application
